

## The Shocker...

Up to 12,000 lbs towing capacity...  
The only hitch you need.

# Shocker Cushion Hitches

## What can air ride Shocker cushion hitches do for you?

You've spent thousands on your trailer and tow vehicle to provide a safe and comfortable towing experience. Now, why not spend a small amount on the connection between the two and dramatically smooth out your ride?

### Shocker Dampening Action

There is no reason to beat yourself or your equipment up anymore with a hard connection between the trailer and your receiver hitch. Eliminate vibrations, constant bumping, jerking, etc. and instead get an air ride with the Shocker cushion hitch.

**[I'm Ready To Order!](#)**

Our economical cushion hitch standard Shocker is designed for ease of use in most common applications. The Shocker slides into a standard two-inch receiver tube. Standard Shocker comes with three polyurethane bump cushions (for various towing weights). Soft - 100 to 400 lbs tongue weight, Medium - 400 to 800 lbs tongue weight, Hard - 800 to 1200 lbs tongue weight.

## Your ultimate, smooth air ride experience

The air hitch Shocker is a miniature air suspension unit mounted between your truck and trailer. This Air Shocker mounts the same as our standard unit, sliding into a two-inch receiver tube. The air bag sits under the receiver tube allowing a short distance of 10-inches between mounting pin and ball center. You will find the advantage of the Air Shocker is your ability to adjust air pressure for best ride and load control. Another benefit from our air ride Shocker hitch is it can be used as a tongue scale, 5lbs air pressure per 100lbs tongue weight.

## Let's Review the Benefits

- 1) **Provide comfort** with a smoother ride! Travel a lot on concrete highways? No more jarring every time you cross a section divider. Your Shocker air hitch absorbs all the thump, thumps.
- 2) Since the Shocker air hitch model works as tongue scale, you can **remove the guesswork from load balancing** ! Order one today and ride safer on your next trip.
- 3) **Save money** by reducing trailer breakage! The Shocker cushion hitch and air hitch models both help absorb the bumping and vibration experienced with a typical hard connection. This greatly reduces the chances of breaking welds and doing other long term damage to your equipment.
- 4) Improve vehicle control and **increase safety!**
- 5) **Add life to your vehicle** by reducing wear and tear on driveline!

Treat yourself, your riders, and your equipment to an air ride with a Shocker hitch today. Try either our [economical cushion hitches](#) or our [air hitch Shocker](#) model that also doubles as a tongue weight scale. You'll never go back to the 'old days' of continual bumps, jerks, and vibrations. Believe us when we say you'll never give up your Shocker air hitch. Our customers just keep transferring it from one vehicle to the next. Order one today and get ready for your ultimate smooth towing experience the next time out.
