Hella, Inc. 9-digit part numbers are included throughout.

Why Use Hella?

The first electrical headlamp. The introduction of Xenon headlamps. Hella has led the way in automotive lighting development for over 100 years – a legacy we continue today with new technologies including CELIS, Bi-Xenon, and VARILIS directional lighting. When some of the most respected names in the automotive industry, such as Audi, BMW, Porsche, and Mercedes-Benz, want the most advanced technologies in lighting and active safety on their newest flagship model, they call Hella. Virtually every major automobile manufacturer in the world counts on Hella original equipment products – and that same level of quality and innovation can be found in every one of our aftermarket products.

Hella innovation isn't limited to the OE market – our lamps have been proven on tracks and race courses around the world. At the 24 Hours of Le Mans, Rolex 24 Hours of Daytona, 12 Hours of Sebring, and the Baja 1000 being able to see during the night is the difference between winning and losing. Many times it is the essence of survival. So when drivers at these premier races want the edge, they expect nothing less than Hella. In the last ten years Hella has dominated these events, with Hella-equipped cars winning 30 out of a possible 30 track events.

Robby Gordon (Robby Gordon Motorsports) knows that no matter where or what you race, Hella lighting is a must.

In his multiple 24 Hours of Daytona and 12 Hours of Sebring wins he has depended on Hella, and he wouldn't think of tackling the Baja 500 and 1000 with anything other than Hella on his Trophy Truck.

So pick your reason for using Hella – world-class performance, leading-edge technology, outstanding style, or the assurance of better driving safety – and then pick your Hella light.

The professionals use Hella - shouldn't you?

Lighting Technology

These are the technologies that set lighting from Hella apart.

FF (Free Form) Free Form lights use as many as 50,000 reflector points to direct light precisely. The reflector alone distributes the light - unlike traditional lamps, which depend on the lens to create the beam pattern. The result? An even spread and almost no stray light. Lights using Free Form reflectors produce up to three times more illumination than ordinary lights.

DE (Projector Type Light) An elliptical reflector directs the light to a focusing lens which bundles it and projects it onto the road. A shield positioned between the reflector and the lens provides precise cutoff. The advantages of DE technology are smaller lamp dimensions and almost twice the light output with hardly any scatter loss.

Xenon Xenon (or HID) technology is the ultimate in auxiliary lighting, providing 2.5 times the intensity of halogen light sources yet requiring only a 35W capsule. Xenon lamps produce a blue-white light which simulates daylight conditions.

Bi-Xenon The next step in Xenon technology, Bi-Xenon lamps use one lamp module to perform both high and low beams. The advantage is a only a single unit to be mounted in the vehicle body.

CELIS Most widely known as the "Angel Eyes" look, CELIS (Central Lighting Systems) employs extremely flexible fiberglass "light guides" ranging from one to seven millimeters transport light from a single source into headlamps, auxiliary lamps, and rear lighting from Hella.

VARILIS Variable Intelligent Lighting System - only from Hella. This pioneering concept in automotive lighting allows the lamps to adapt to

driving conditions, be it speed, weather, or road type. The result is the best lighting for all conditions and a safer, more relaxed drive.

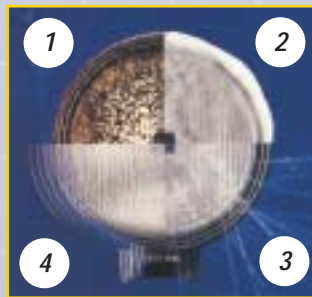

Magnesium Reflectors Space age material is light but strong, provides high intrinsic strength and extremely high thermal resistance, critical in smaller, projection-style lamps.

High-Boost Reflectors Pure aluminum coating applied within the clean environment of a vacuum provides added reflectivity to Hella reflectors, ensuring the greatest possible light output.

Hella Endurance

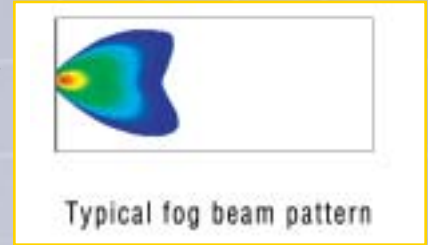

Hella auxiliary lamps are legendary for their ruggedness and dependability. Every one of our lamps must pass a series of endurance tests before we will brand it "Hella".

1. Five hours of off-road driving are simulated by uniform spraying with mud.
2. For one hour, the headlamps are subjected to temperatures between -40°F and +176°F. Shock treatment between the arctic and tropics.
3. For one hour, the headlamps are sprayed with water at a pressure of 58 psi. This simulates driving in torrential rain.
4. One hour of vibration testing at 750 oscillations per minute. This simulates the toughest conditions resulting from potholes, cobblestone pavement, and other off-road tortures.

Fog Lamp Advantages

Humidity and moisture are natural enemies of good vision when driving. Fog, rain, dust, and snow can all cause the beam of standard headlamps to be reflected back into the driver's eyes. The result? An impenetrable wall of haze and the inability to recognize hidden hazards. Hella fog lamps shine beneath this wall of haze, resulting in a dramatic reduction in glare and improvement in visibility. Additionally, Hella fog lamps are equipped with specially designed reflectors which evenly illuminate the width of the road, providing a wide, safe path of light to drive by.

Driving Lamp Advantages

Driving at night produces stressful conditions for even the most experienced motorist. The eye is often overburdened, and only 1/20 of the normal visual acuity is achieved while driving at night. Many

obstructions often lurk in the distance, such as animals scurrying across the road, fallen trees, and other hazardous situations which go unnoticed until it is too late. Driving lamps from Hella provide the driver a greater range of vision, illuminating obstacles even standard headlamps can miss. The advantage to the driver is a dramatically reduced level of difficulty while night driving and increased safety.

SAE vs. ECE Compliance

SAE regulations cover vehicles driven in the USA. Lamps designated as "SAE Compliant" are legal for use on public roads in the USA.

ECE regulations are established by European regulatory bodies for vehicles used in Europe. For headlamps, ECE lighting also complies with Canadian regulations. ECE compliant tail lamps are NOT compliant with either Canadian or US regulations.

Off-Road lamps and accessories are strictly for use in off-road or racing situations and should not be used for everyday driving conditions. Street-legal accessories are able to be used on public roads and highways.

Always check local regulations before installing any auxiliary/ aftermarket lighting to ensure you meet all legal requirements.

NEW!

The Next Big Thing in Performance: Rallye 4000 Compact

Hella takes technology to a new level of performance with the Rallye 4000 Compact. Everything racers have depended on for years – rugged metal housing, unparalleled light output – now 24% smaller than the original.

The Rallye 4000 Compact features zinc die-cast housings, an optics-free clear glass lens, and a newly designed reflector. The “high-boost” FF reflector ensures maximum light output thanks to the application (under a high vacuum) of purest aluminum in the mirror layer.

The lamp diameter of 6.69” is suited to today’s smaller brush guards. And with a depth of only 1.93” from

24% smaller!

the center mounting screw, the Rallye 4000 Compact is perfect for light trucks and SUVs with shorter noses.

Lamps are available with matte black metal or high-shine chrome metal housings. Choose from standard driving beam or upgrade to the extra pop of CELIS light rings powered by the brightest LED available today - either way you get knock-out good looks and outstanding Hella Rallye performance.

Rallye 4000 Compact
6.77”H x 6.69”W x 4.49”D

- Black Euro Beam #009094022
- Black Euro Beam w/CELIS #009094042
- Chrome Euro Beam #009094031
- Chrome Euro Beam w/CELIS #009094051

All Rallye 4000 lamps sold as singles. Compact lamps require H1 12V 55W bulb and wiring harness, sold separately (see Rallye 4000 Accessories, pg 7).

Rallye 4000 Series: The Most Durable Lamp on the Planet!

Baja, Daytona, and Le Mans racers know: the only lamp to use is the Rallye 4000 from Hella.

Our most rugged auxiliary lamp, in styles to match any ride. Xenon and halogen versions for the performance level you need. Lamps feature metal housings & glass lenses for unmatched durability, and knurled adjustment knobs for fast adjustments.

Rallye 4000 Xenon

Designed for use by motorsports professionals, the Rallye 4000 Xenon puts 50,000 Volts of lighting power at your fingertips. The system uses a compact ballast which mounts behind the bumper or grille. The lamp’s xenon-filled capsule produces 2.5 times more light than a standard halogen light source, but draws only 2.9 amps.

Rallye 4000 Xenon
9.19”H x 8.75”W x 6.38”D

- Euro Beam #74801 New #007560542
- Pencil Beam #74802 New #007560552

All Rallye 4000 lamps sold as singles. Xenon lamps include D2S xenon capsule, ballast, wiring harness, and mounting hardware.

Rallye 4000 CELIS

Premier technology from Hella - the Rallye 4000 now with the CELIS light guide ring for unique style. The halogen lamp features an enhanced FF reflector which provides a precise Euro driving beam, plus all the durability of the original.

Striking CELIS look when lit

Rallye 4000 CELIS

9.19"H x 8.75"W x 5"D

Black housing #74820 New #H12560111

Chrome housing #74821 New #H12560121

All Rallye 4000 lamps sold as singles. Halogen CELIS lamps include bulb and mounting hardware and require wiring harness, sold separately (see Rallye 4000 Accessories, pg 7).

Rallye 4000 Blue

Serious performance meets serious style in a blue lens and chrome metal body. Halogen driving beam appears white when lamp is on.

Rallye 4000 Blue

9.19"H x 8.75"W x 5"D

Driving lamp w/city light #74818 New #H12560101

All Rallye 4000 lamps sold as singles. Halogen Blue lamp includes bulb, stone shield, mounting hardware and requires wiring harness, sold separately (see Rallye 4000 Accessories, pg 7).

Rallye 4000 Metal & Chrome

Advanced halogen lighting performance in a state-of-the-art lamp. Matte black or chrome metal body with knurled knobs.

Rallye 4000 Metal

9.19"H x 8.75"W x 5"D

Fog lamp #74805 New #H12560001

Rallye 4000 Chrome

Fog lamp #74815 New #H12560011

Euro w/city light #74816 New #H12560041

All Rallye 4000 lamps sold as singles. Halogen Metal and Chrome lamps include bulb, stone shield, mounting hardware and require wiring harness, sold separately (see Rallye 4000 Accessories, below).

Rallye 4000 Accessories

Wiring Harness - for use with all Rallye 4000 halogen lamps. Will wire two lamps. #87202 New #148541001

Covers and Grilles fit all Rallye 4000 models, including Xenon. Covers and Grilles sold in singles.

Clear Cover #79140 New #H87988131

Protective Grille #79387 New #148995001

Mounting Bracket for Rallye 4000 Halogen Lamps

Exclusively for halogen versions of the Rallye 4000, our bracket allows vertical mounting of the lamp in situations where the standard mount cannot be accommodated.

Rallye 4000 Mounting

Bracket #87207 New #150329001 *Sold in singles.*

2100/220 Series

Truckers have depended on these lamps for years - and Hella offers three versions to suit most any need. Choose from Xenon, halogen, or halogen blue and see the difference!

Rallye 2100 Xenon

Designed for racing or off road use, the Rallye 2100 Xenon incorporates Hella's innovative Xenon technology and FF reflector in a distinctive rectangular shape. Metal housing and glass lens for durability. External ballast for flexible mounting.

Rallye 2100 Xenon
5.25"H x 9.5"W x 5.13"D
Driving lamp #77806 New #002537471
Single lamp includes D2S xenon capsule, ballast, and wiring harness.

Jumbo 220

Trusted performance from the original 220 lamp - ABS body, patterned glass lens. Also available with the fresh addition of a patterned blue lens which burns brilliant white when lit.

Jumbo 220
5.19"H x 9.44"W x 3.5"D
Driving lamp #77710 New #H12300021
Fog lamp #77810 New #H12300001
Blue driving lamp #77715 New #H12300031
Single lamp includes bulb. Requires wiring harness, sold separately (#87199 - New #H84994031).

NEW! Rallye 3000 Compact

Super new styling and user-friendly compact size. The Rallye 3000 Compact is 22% smaller than the full-size original. The new FF "high boost" reflector provides optimal light output thanks to the application (under a high vacuum) of purest aluminum in the mirror layer, for performance superior even to the traditional Rallye 3000. Free Form also allows the modern styling of an optics-free clear lens.

22% smaller!

Available in three versions: driving lamp; driving lamp with CELIS light guide rings as the position lamp; and fog lamp. All lamps feature silver bezel and black ABS housing.

Rallye 3000 Compact
7.68"H x 6.89"W x 4.72"D
Driving lamp #009390011
Driving lamp w/CELIS #009390021
Fog lamp #009390001
Single lamp requires H1 12V 55W bulb (#78105- New #H83115001) and wiring harness, sold separately (#87199 - New #H84994031).

Rallye 3000 Blue

Free form reflector, ABS housing, and trendy blue lens. Sharp white beam when on. Available in two beam patterns, so you can pick the optimal beam for your needs.

Rallye 3000 Blue
9.94"H x 8.75"W x 4.94"D
Driving lamp w/city light #74545 New #H12800051
Pencil beam #74546 New #H12800061
Single lamp includes bulb; wiring harness sold separately (#87199 - New #H84994031).

FF1000 Series

The next generation of classic performance from Hella. FF1000 lamps feature FF reflectors made of magnesium, the same material used in Formula 1 race cars and aerospace applications. This provides unparalleled durability and assures outstanding performance even in the most extreme conditions.

FF1000 Xenon

Xenon power in a smaller size. Features the same attributes as the halogen version but with a high-intensity xenon light source. External ballast.

FF1000 Xenon
7.75"H x 7"W x 4.88"D
Driving lamp #74535 New #008273041
Pencil beam #74536 New #H12273041
Single lamp includes D2S xenon capsule, ballast, stone shield, and wiring harness.

FF1000 Halogen

Flexible mounting options allow installation almost anywhere!

FF1000 Halogen
7.75"H x 7"W x 4.13"D
Driving lamp #74530 New #H12273001
Pencil beam #74531 New #H12273011
Driving lamp w/city light #74532 New #H12273051
Driving lamp kit #74539 New #H13273601
Single lamp includes bulb, stone shield, except 74532 (bulb only); all require wiring harness, sold separately (#87212 - New #H84994051). Kit includes 2 lamps, bulbs, stone shields, wiring harness.

See our Accessories section for FF1000 heavy-duty mounting brackets!

DynaView®

Driving through curves at night has always been dangerous, until now. DynaView® from Hella offers a revolutionary solution: light that curves as you drive.

The DynaView® system includes two lamps, each with dual reflectors, plus a transverse acceleration (or yaw rate) sensor for detecting the vehicle's movements through turns.

The complete DynaView® lighting system

The main headlamp beam provides illumination for conventional driving, while the cornering beam in the appropriate lamp is automatically switched on when the sensor detects the vehicle entering a curve.

The DynaView® shares the styling and shape of the FF1000, making it a versatile lamp for most vehicles. Driving into a dark corner is a thing of the past. **DynaView® - Only from Hella!**

DynaView®
7.75"H x 7"W x 4.88"D
DynaView® kit #74542 New #008690801

Custom Subaru Mounting Brackets for FF1000 Series Lamps

Designed for mounting any FF1000 series lamp (including DynaView®) to the Subaru Impreza or WRX, our custom bracket fixes to the vehicle utilizing the OEM mounting points and hardware, so no modification is necessary. For model years 2002-2003.

FF1000 Subaru WRX Mounting Brackets #96628

New #H84950771

Jumbo 320 Series

A new profile in auxiliary lighting. Clear glass lens and magnesium FF reflector. May be mounted upright or pendant.

Jumbo 320 Xenon

Xenon version features 6 high-performance white LEDs for the city light. External ballast for flexible mounting.

Jumbo 320 Halogen

Choose from fog or driving. Driving lamp incorporates city light with included 5W incandescent bulb.

Jumbo 320 Xenon

6.38"H x 9.63"W x 4.34"D

Driving lamp #77906 New #H12773021

Single lamp includes D2S xenon capsule and ballast.

Jumbo 320 Halogen

6.38"H x 9.63"W x 4.34"D

Driving lamp #77720 New #H12773001

Fog lamp #77820 New #H12773031

Single lamp includes H7 bulb.

FF200 Xenon

This elegant Xenon driving lamp provides wide illumination by utilizing an FF reflector. Hella's flexible mounting technology provides greater stability and easy installation.

FF200 Xenon

5"H x 5.63"W x 3"D

Driving lamp kit #74537

New #007893871

Kit includes 2 lamps, ballast units, D2S xenon capsules, wiring harness, relay, and mounting instructions.

FF200

Advanced FF lighting technology plus the Hella Fast-Fit™ mounting system make the FF200 an easy choice. Contemporary round design and clear lens with a paintable ABS housing. The Hella Fast-Fit™ system maintains an extremely tight grip on the lamp to keep beam placement accurate. Fast-Fit™ mounts with a single nut and bolt or two molly bolts for tight spots and limited access areas.

Our Mini Cooper kit pairs the FF200 chrome with a custom mounting bracket for installation using OEM mounting points.

FF200

6"H x 5.63"W x 3"D

Driving lamp kit #74200

New #H13893601

Chrome driving

lamp (single) #74230

New #H12893051

Mini Cooper kit #74519

New #007893891

Standard kit includes 2 lamps, bulbs, wiring harness and mounting hardware. Mini Cooper kit also includes custom mounting brackets.

FF Series

Hella SAE-compliant fog and driving lights utilize a magnesium FF reflector for optimum light distribution. These compact lamps were specifically designed for mounting flexibility within a limited space. Our blue kits feature a blue-tint lens for sporty appearance and a sharp white driving beam.

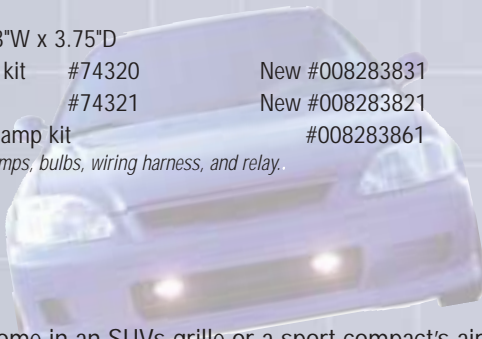

FF50

The perfect oval shape to complement today's sport compacts and light trucks.

Original and new Blue FF50 lamps

FF50
2.56"H x 4.63"W x 3.75"D
Driving lamp kit #74320 New #008283831
Fog lamp kit #74321 New #008283821
Blue driving lamp kit #008283861
Kits include 2 lamps, bulbs, wiring harness, and relay.

FF75

Equally at home in an SUV's grille or a sport compact's air dam - the extremely low profile of the FF75 goes where other lamps don't dare.

Original and new Blue FF75 lamps

FF75
2.13"H x 6.13"W x 3.81"D
Driving lamp kit #74322 New #008284831
Fog lamp kit #74323 New #008284821
Blue driving lamp kit #008284861
Kits include 2 lamps, bulbs, wiring harness, and relay.

Micro DE Series

Unlike many "micro" sized lamps that do little more than provide accent lighting, Hella's Micro DE lamps give you the best of both worlds... compact size and Hella lighting performance. Micro DE incorporates true projector lens optics to aim a precise beam of light exactly where you need it.

Micro DE Xenon

All the durability and light weight of Hella's Micro DE but with cutting edge Xenon technology. SAE compliant. Also in custom kit for the Jetta IV.

Micro DE Xenon
2.63"H x 2.88"W x 4.69"D
Driving lamp kit #74522 New #008390801
Kit includes 2 lamps, ballast units, D2S xenon capsules, wiring harness, relay, and mounting instructions.

Micro DE Xenon Custom Driving Lamp Kit
VW Jetta IV #74515 New #008671801
Kit includes 2 lamps, ballast units, D2S xenon capsules, wiring harness, relay, custom grilles, and mounting instructions.

Micro DE Halogen

The fog lamp with compact size and big light! Choose our standard kit for any vehicle or pick a custom kit: Micro DE lamps combined with vehicle-specific grilles to give you that "from the factory" look.

Micro DE Fog Lamp Kit
2.63"H x 2.88"W x 5.5"D
Black bezel #74527 New #H13090611
Kit includes 2 lamps, bulbs, wiring harness, mounting hardware.

Micro DE Custom Fog Lamp Kits
VW Golf IV #74517 New #008383821
VW Golf IV with remote #74550 New #008383851
VW Jetta IV with remote #74518 New #008383861
Kits include 2 lamps, bulbs, wiring harness, mounting hardware, and custom grilles.

Micro FF

Only Hella can put this much lighting power in a compact package. The Micro FF outperforms halogen lamps more than twice its size.

Micro FF

3.42"H x 4.72"W x 2.56"D

Driving lamp kit #74500

New #007133811

Fog lamp kit #74503

New #007133801

Kits include 2 lamps, bulbs, stone shields, wiring harness, mounting hardware.

Black Magic

Exclusively from Hella – Black Optics™ Technology. Off, the Black Magic creates a striking all-black look...flip the switch and you get a super bright, enhanced-focus driving beam. No one else delivers this exotic style!

Black Magic features reinforced ABS housing, water-tight assembly, and a vapor-coated reflector. Add a pair of clear covers (sold in singles) to protect the lens while keeping the look true.

Black Magic

8.88"H x 7.38"W x 3.44"D

Driving lamp kit #75804

New #004700771

Clear cover #79111

New #H87988121

Kit includes 2 lamps, bulbs, wiring harness, mounting hardware.

Expedition Range Lamps

These lamps have everything it takes to be Hella – world-class quality, brilliant performance, and off-road durability, all with great affordability. Choose your shape, in the size and beam pattern that best fits your ride. You get an impact-resistant reinforced ABS housing, bonded water-tight lens, and an aluminum vapor-coated reflector.

NEW!

50mm Modules

An extension of our popular custom module program, Hella's premium 50mm Modules are SAE certified, making them perfect for today's unique vehicle styling requirements.

High and low beam lamp modules feature a pattern-free lens; fog lamp module features a lens pattern similar to the Micro DE fog lamp.

Available in Xenon & Halogen

All 50mm Modules are supplied with 4-point mounting frames and feature Hella's signature premium silver bezel.

50mm Xenon module	
Xenon Main beam, 12V	#008390317
Xenon Main beam, 24V	#008390327
Xenon Low beam, 12V	#009071091
Halogen Low beam, 12V	#009071081
Halogen Fog beam, 12V	#008090317
Halogen Fog beam, 24V	#008090327

All 50mm Xenon single lamps include xenon ballast unit. Contact your Hella dealer for module dimensions

90mm Modules

Ideal for custom applications, 90mm Modules from Hella work with virtually all vehicles, from hard working trucks and winning race cars to the most exotic motorcycles. All versions meet SAE standards.

90mm Module		
Xenon Low beam	#68139	New #008194047
Bi-Xenon unit	#68141	New #008934041
Halogen High beam	#68136	New #008191057
Halogen Low beam	#68137	New #008193027

All 90mm Xenon and Bi-Xenon single lamps include xenon ballast unit. Contact your Hella dealer for module dimensions

Conversion Headlamp Kits

Vision Plus Conversion Headlamps

Hella's Vision Plus delivers powerful lighting at the maximum legal limit without increasing glare to on-coming traffic. An advanced HB2 (9003) halogen bulb and high-sheen metal reflector are combined with advanced optics to provide a more uniform, controlled, and even illumination on the road.

Increases Range, Reduces Eye Stress

Hella's Vision Plus produces a 50% more powerful low beam and a 25% more powerful high beam than standard halogen sealed beam headlamps. This produces a greater range of vision for the driver, improves driver safety and reduces driver strain and fatigue. And the replaceable-bulb design saves money – no need to replace the entire unit if a bulb goes.

Vision Plus: Powerful Performance from Hella.

Vision Plus Halogen Conversion Headlamps

200mm	#72207	New #003427291
7" Round	#70477	New #002395301

Single lamps each with high/low beams fit left or right and meet SAE/DOT US standards for street and highway driving. 12V 60/55W, HB2 bulb.

ECE Off-Road Halogen Conversion Kits

Upgrade to Hella's premium European-style headlamps. Precise optics improve your vision and making driving in all conditions safer. **Lamps are ECE compliant, legal for on-road use only in Canada.**

200mm H4 high/low	#72200	New #003427811
165mm H1 high beam only	#72151	New #003177821
165mm H4 high/low	#72150	New #003177801
7" round H4 high/low	#70472	New #002395801
5 3/4" round H1 high beam only	#71152	New #002425811
5 3/4" round H4 H4 high/low	#71452	New #002850811

Kits contain 2 lamps, bulbs, silicone dustcovers. For optimal results, we recommend the installation of a relay (fused - H41510061, or unfused - 003510361).

Color Design Head and Tail Lamps

Hella DOT Compliant Color Design head and tail lamps set your Audi, Golf, or Jetta apart from the rest.

Jetta IV Black-Look Headlamps with Foglamp

HydroLUX® - Submersible Lamps

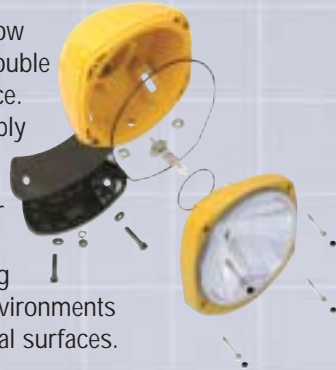

The newest line of rugged off-road lighting from Hella: HydroLUX®. Designed for the harshest conditions a lamp can encounter, the HydroLUX® series of lamps are the ultimate in durability.

HydroLUX® submersible lamps employ a patented multi-chamber isobaric system, preventing water from getting into the optical components. Water is purged from the pressure housing when lamp surfaces after immersion. Each lamp is pressure tested to a depth of 3 feet (1 meter) and supplied with its own test certificate of conformance and serial number.

Captive Hex bolts on lamp front allow quick bulb replacement. Captive double o-ring seals for optimal performance. One-way fit ensures correct assembly and sealing every time.

Patented Hella MUSTADD® multi-air filter provides protection against dust, chemicals, and water, allowing the lamp to operate in corrosive environments without risk of damage to the optical surfaces.

FF1000 reflector provides the Hella lighting performance you expect. Designed for upright mounting only. Lamp is prewired with 8' pigtail featuring high-temperature insulation material factory sealed in the the alloy body without the need for special waterproof connectors.

HydroLUX®

Height includes bracket; width is actual lamp body diameter.

Hella Bulbs

Hella's bulb range consists of Xenon capsules, Xenon Premium halogen, Yellow Star halogen, standard halogen bulbs, plus our newest addition, High Performance Xenon Blue bulbs. Our wide range of sizes and wattages makes choosing a Hella bulb easy!

Xenon Capsules (Gas Discharge)

Xenon capsules create a light from an electrical discharge between two electrodes in an environment of metal halide salts, mercury, and xenon gas hermetically sealed in a quartz capsule. Hella's xenon capsules provide a blue-white light source that is very close to natural daylight and deliver at least 70% more light at a lower wattage than traditional lamps. Xenon capsules should be used exclusively with xenon lamps/ballasts.

Xenon Premium

Hella's Xenon Premium halogen bulbs deliver a 30% higher light output and wider field of vision than standard halogen bulbs. The addition of xenon gas increases bulb performance.

Yellow Star

Yellow Star halogen bulbs feature multi-layer technology to produce a contrasting yellow light, which improves visibility when driving during rain, fog, or snow.

Halogen Bulbs

Halogen bulbs by Hella can be relied upon for their long life and light output. Rigorous testing ensures our bulbs will stand up to the wear and tear of everyday driving. OEM quality.

NEW! High Performance Xenon Blue

Hella's High Performance Xenon Blue bulbs are the new market standard. Produced under Hella's stringent testing requirements, our bulbs beat all others on the market. Correct filament alignment assures maximum light output. The blue glass provides the crisp white beam pattern consumers today demand.

Hella's Performance Xenon Blue bulb range features on-road, DOT-compliant bulbs in most popular base types, as well as higher-wattage off-road-use bulbs.

When you want to see better, go Xenon Blue with Hella.
