Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures MUST be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Un-fasten air box clamps. (Fig. 1)
2. Remove the air box lid from the vehicle and remove the stock air filter. (Fig. 2)
3. Wipe out any dirt or dust that may be inside the air box.
4. Place the K&N Air Filter in the air box, with one of the ears on the filter top, locking behind the step in the bottom of the air box base. (Fig. 3)
5. Now snap the K&N Air Filter in place by putting slight pressure on the filter base. Make sure the filter is properly seated in the oval air box cavity. (Fig. 4)
6. Re-install the air box lid and re-fasten the air box clamps. The step in the air box lid will fit behind the other ear on the filter top and keep the filter in place. (Fig. 5)

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
