

# Installation of drain plugs

## TOOLS REQUIRED

Drill

1" hole saw

#2 Phillips screwdriver

Drill 1" hole at center dimple of drawer depression

**STEP 2** • Squeeze sealant onto underside of drain plug plate

**STEP 3** • Screw plate into drawer depression

NOTE: Drain plugs don't really work with long drawers, unless you're Kareem Abdul-Jabbar, as you won't likely be able to reach them
