Why Air Springs?

Tow and Haul with Safety and Comfort with Air Lift Adjustable Air Spring Kits

- Air springs ensure that weight is properly distributed to all four tires, which maximizes vehicle stability, safety and comfort (see graphics below)
- Add air when towing or hauling; deflate when riding empty for a softer ride
- Made with rugged, durable components
- Easy and quick to install with common hand tools
- No. 1 choice of professional drivers

WITHOUT AIR LIFT AIR SPRINGS...

The vehicle squats, and the possibility of body roll and bottoming out increases.

WITH AIR LIFT AIR SPRINGS...

Ideal ride height is restored, providing greater safety and comfort.

Air Lift air spring kits solve these common problems

Squat
Proper weight distribution to all tires improves steering, braking and tire wear. This is especially important while towing: adjust the air springs to accept the tongue weight of the trailer.

Headlight Aim
Only level and stable vehicles provide safe and proper headlight aiming — critical for night driving safety.

Braking and Steering
Front tires account for the majority of braking and steering. Air springs ensure that weight is properly distributed to all four tires for optimal braking and steering.

Bottoming Out
Air Lift springs restore normal ride height when loaded or towing, reducing suspension wear and eliminating crashing on bumps.

Rough Ride
Air Lift's progressive spring rate soaks up bumps, keeping tires on the road for better handling.

Body Roll
Air springs increase spring rate and vastly improve vehicle stability. Less roll means a safer and more comfortable ride.

Trailer Sway
When towing a trailer, air springs permit precise vehicle height adjustment for exact alignment, reducing trailer sway.

Why Air Lift?

Load Support Products That Fit, Work and Last. Guaranteed.

- A 3rd generation, family-owned Lansing, Michigan, suspension-specialty company since 1949
- Our in-house customer service department is available to answer your questions Monday through Friday, 8am-8pm (EST)
- The most comprehensive warranty plus an exclusive 60-day no-questions-asked, money-back guarantee
- Over 450 vehicle fitments
- Don't run around town trying to find a working air pump... Air Lift has the most innovative, easy-to-use on-board air compressor systems available

INDUSTRY EXCLUSIVE! Air Lift's Lifetime Warranty Covers the Entire Contents of the Air Spring Kit

While other companies offer a lifetime warranty on their air springs, only Air Lift covers the air springs as well as the entire contents of the kit, including brackets, fittings and air line. Air Lift Company warrants that Air Lift 1000, Air Lift 1000 HD, RideControl, LoadLifter 5000, LoadLifter 5000 Ultimate, LoadLifter 7500 XL Ultimate and ProSeries air spring systems will be free from manufacturer's defects in workmanship or materials for as long as the original purchaser owns the original vehicle of installation. This does not include installation or other service charges for replacement. Purchase receipts are required for all warranty claims. Go to www.airliftcompany.com/warranty/ for official warranty program details.

INDUSTRY EXCLUSIVE! Air Lift Guarantees Your Satisfaction or Your Money Back!

Air Lift offers a 60-Day No Questions Asked, Money-Back Guarantee on load support air springs and all load support on-board air compressor systems. Ride on Air Lift's air springs kit and/or use an Air Lift on-board air compressor system for 60 days. We guarantee you'll be happy with the improvement in ride comfort, load handling and air spring control, or get your money back. If you're not satisfied, you may remove the products and return them to your dealer for a full refund of your purchase price within the first 60 days after purchase.

Refund must be made by the selling agent. Offer is limited to purchasing a set of Air Lift 1000, Air Lift 1000 HD, RideControl, LoadLifter 5000, LoadLifter 5000 Ultimate, LoadLifter 7500 XL Ultimate, ProSeries or Slam Air air springs; limited to WirelessAir, WirelessOne, all LoadController on-board air compressor systems. Offer may be withdrawn at any time and does not include any units improperly installed, modified, substituted or abused. Valid only on private, non-commercial applications. Date proof of purchase is required. Does not include reimbursement for labor/installation.

Two-Year Warranty When Consumer Installs Themselves

Air Lift Company warrants to the original purchaser that WirelessAir™, WirelessOne™ and all LoadController™ on-board air compressor systems will be free from defects in workmanship or materials for two years on the vehicle from the date of the original purchase. This does not include installation or other service charges for replacement.

Four-Year Warranty When Installed by an Authorized Installer

When installed by an Air Lift Authorized Installer, Air Lift Company warrants to the original purchaser that WirelessAir and WirelessOne on-board air compressor systems will be free from defects in workmanship or materials for four years from the date of the original purchase. This does not include installation or other service charges for replacement.

Warranty programs may change at the discretion of Air Lift Company. View complete, detailed warranty information at <http://air-lift.co/ls warranty>

We have a kit for almost any coil-sprung vehicle

Can't find an air spring kit for a coil-sprung vehicle? Air Lift 1000 Universal Air Spring Kits fit almost any open coil spring to provide up to 1,000 lbs. of load-leveling support*. Just take two simple measurements and use the chart below to find the correct kit for your application.

Finding the correct application is as easy as 1-2-3!

1. **Unload the vehicle** in order to take the most accurate measurements of the coil springs. Once the vehicle is at normal ride height, then move on to step two.

2. **Take two measurements.** Measure the inside height (X) — the available height within the coil spring. Then, measure the inside diameter (Y), or the width available inside the coil from side to side at its widest point (see diagram).

3. **Find the corresponding part number.** Using the chart on the right, find the row that contains the correct inside height and inside diameter, and see which part number lines up with those values. It is better to be slightly undersized than oversized.
- UPPER SPRING SEAT

LOWER SPRING SEAT

* Never exceed manufacturer's recommended Gross Vehicle Weight Rating.

| Air Lift 1000 Universal Air Springs | | |

Towtal View™ HD Camera with Versatile Mounts

NEW!

Towtal View Camera Features

- + 80° vertical and 110° horizontal field of view (FOV)
- + Wireless HD camera with over 100 feet of reliable range via a strong and secure Wi-Fi connection
- + Free mobile app for iOS and Android to view live color camera feed, record video, capture photos, add/remove backup-assist lines, mirror the image and rotate the image
- + Quick connect mounts allow for easy, no-tool swapping between hardwired and battery pack mounts
- + Infrared LED lights for night vision maintaining color viewing, rather than traditional black & white night vision
- + With a portable mount and 5+ hours of battery, the camera can be mounted in a variety of locations
- + Multi-coated lens for clarity by reducing glare, resisting fingerprints and scratches and improving color accuracy
- + IP68 waterproof rated
- + 2-year limited warranty

Versatile Mount Features

Portable suction cup power pack mount featuring quick-connect mount and 5+ hour lithium-ion battery

- + Multi-position adjustable mounts allow for various viewing angles (-65° down, +45° up)
- + Included hardwired permanent mount with IP67-rated waterproof quick connection easily connects to the trailer lights via the included wiring harness
- + Included rechargeable lithium-ion battery pack built into suction cup mount with 5+ hour battery

Quick-connect permanent mount includes wiring harness and all hardware for easy connection to trailer lights

Quickly move camera between portable and permanent mounts with the quick-mount system

FREQUENTLY ASKED QUESTIONS

Q. Will adding air springs increase the weight rating of my vehicle?

A. No. Adding air springs does not change the Weight Rating (GVWR, GCWR, GAWR) of a vehicle. Adding weight over the factory rating is dangerous and voids your Air Lift warranty. Weight ratings take into account tires, bearings, frame, brakes and more. Increasing your suspension's ability to support weight does not increase the weight ratings. Never exceed your vehicle's weight ratings.

Q. Do you have to add a compressor (On-Board Air Compressor System) to your air springs?

A. A compressor isn't required, but it is convenient! An on-board air compressor system allows you to inflate and deflate your air springs on the go. Compressors remove the hassle of pulling over or searching for service stations with air pumps. With our on-board air compressor systems, all adjustments are automatic and can be made with the touch of a button while driving or parked.

Q. Do I have to keep air in the springs all the time, and how much pressure do I need?

A. Yes, you should always maintain the recommended minimum air pressure of 5 PSI, even if your vehicle isn't loaded. This keeps the air springs "in shape" and able to perform without rubbing or wearing. Just check the air pressure periodically, as you do for your tires.

Q. Can air springs raise or lower my vehicle?

A. If you're asking if conventional air springs can take the place of a lift or lowering kit, the answer is NO. If you're asking if air springs will cause a normal ride height vehicle to ride higher, the answer is YES, if you want them to, by adding pressure, but only by an inch or two. If you DO want to lower your vehicle, look into our Air Lift Performance products. If you have a lowered truck and want to add air springs for towing, look at SlamAir™ (page 34). If you have a lifted truck and would like to add the support of air springs, check out Universal Air Spring Spacers (page 37). Call customer support at (800) 248-0892 for more information.

Q. My vehicle rides rough while towing or hauling; will adding air make it ride better?

A. Absolutely! Air springs are engineered to increase ride quality when carrying heavy loads and help fatigued springs ride smoothly. Our air springs greatly improve ride quality when towing or hauling.

Q. Can I use air springs with factory overload springs?

A. Yes, most of Air Lift's applications work with overload springs. Check our application guide for your vehicle.

Q. How long do air springs last?

A. Forever! If they are properly installed and maintained, our air springs can last indefinitely. Just check the pressure regularly, or use an on-board air system to maintain it for you. Air Lift offers a lifetime warranty on all of our air spring kits. See page 5 for details.

Q. What's better, steel helper springs or air helper springs?

A. Air Lift air helper springs are the best solution because they are totally adjustable — steel springs are not. All you have to do is add or remove air to fine-tune your ride for all load situations! That's the reason professional drivers choose air over steel.

Q. How do I get replacement parts if I ever need them?

A. Air Lift sells many parts individually, while our competitors want to sell you pairs of parts. You can get Air Lift replacement parts from your dealer or directly from Air Lift Company. If your dealer cannot help, call Air Lift at 1-800-248-0892.
