If you do not fully understand the installation procedure, it is highly recommended that you seek help from professional mechanics to do the installation.*

### INSTALLATION TOOLS

**1/4 Ratchet**

**Power Tool**

NOTE: When using power tools, always ensure that you do not overtighten the screws.

**Metal Panel Popper**

**Phillips Screwdriver**

**1/4 Extension**

**Socket**

**Size NEEDED**

**11**

### **PART I - Remove Headlights**

#### **DISCONNECTING THE NEGATIVE BATTERY TERMINAL**

Whenever working on your vehicle, always start by disconnecting the negative battery terminal.

### **REMOVE THE GRILLE**

Start by removing the four screws securing the grille.

Remove the grille by pulling it outward. Set it aside for later

reinstallation.

### **REMOVE THE HEADLIGHTS**

To remove the headlight, first remove the two screws that secure the headlight housing.

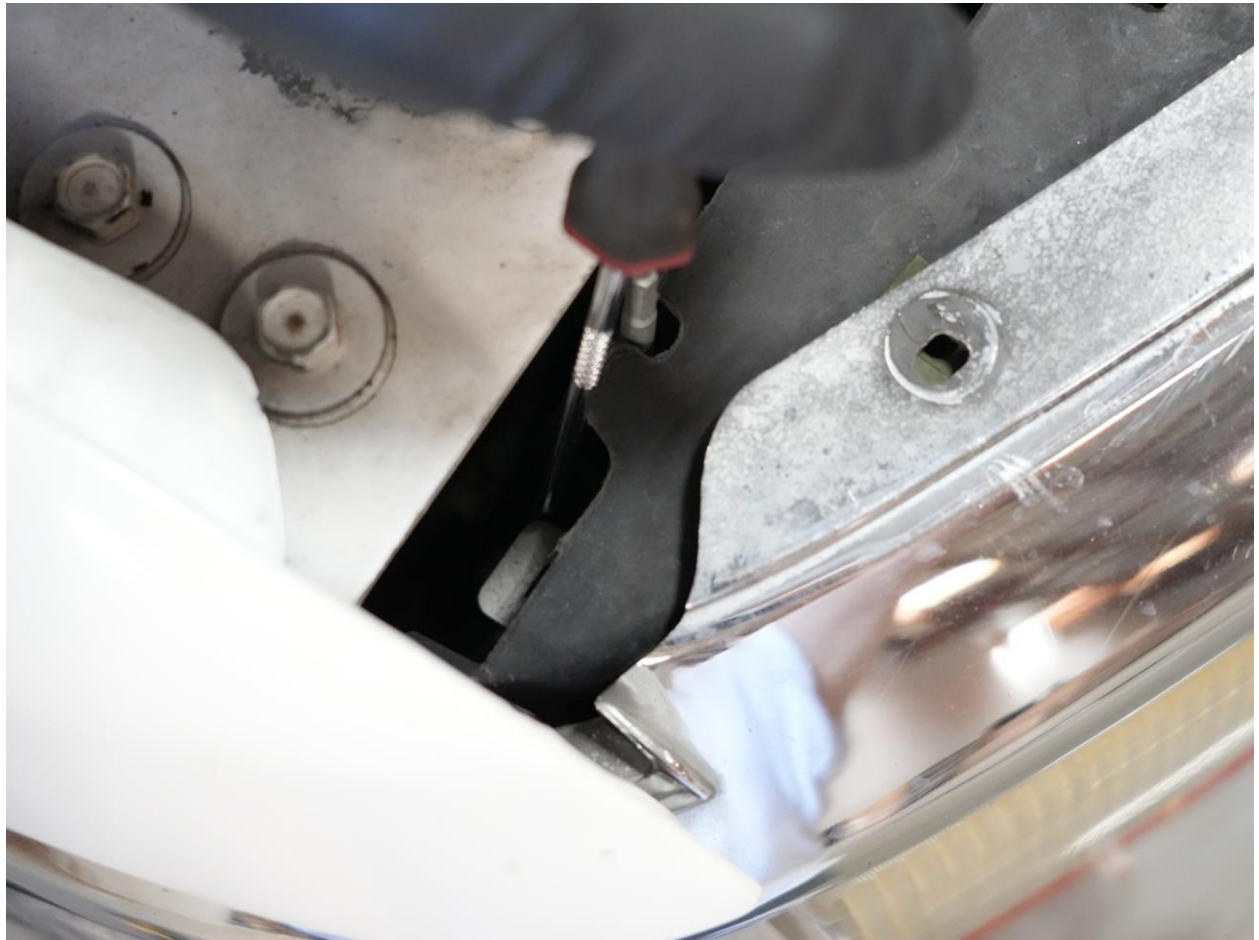

Next, there are three metal clips holding the back of the headlight in place: two on the top and one on the side. Remove the two metal clips from the top first using the Snap Ring Pliers tool.

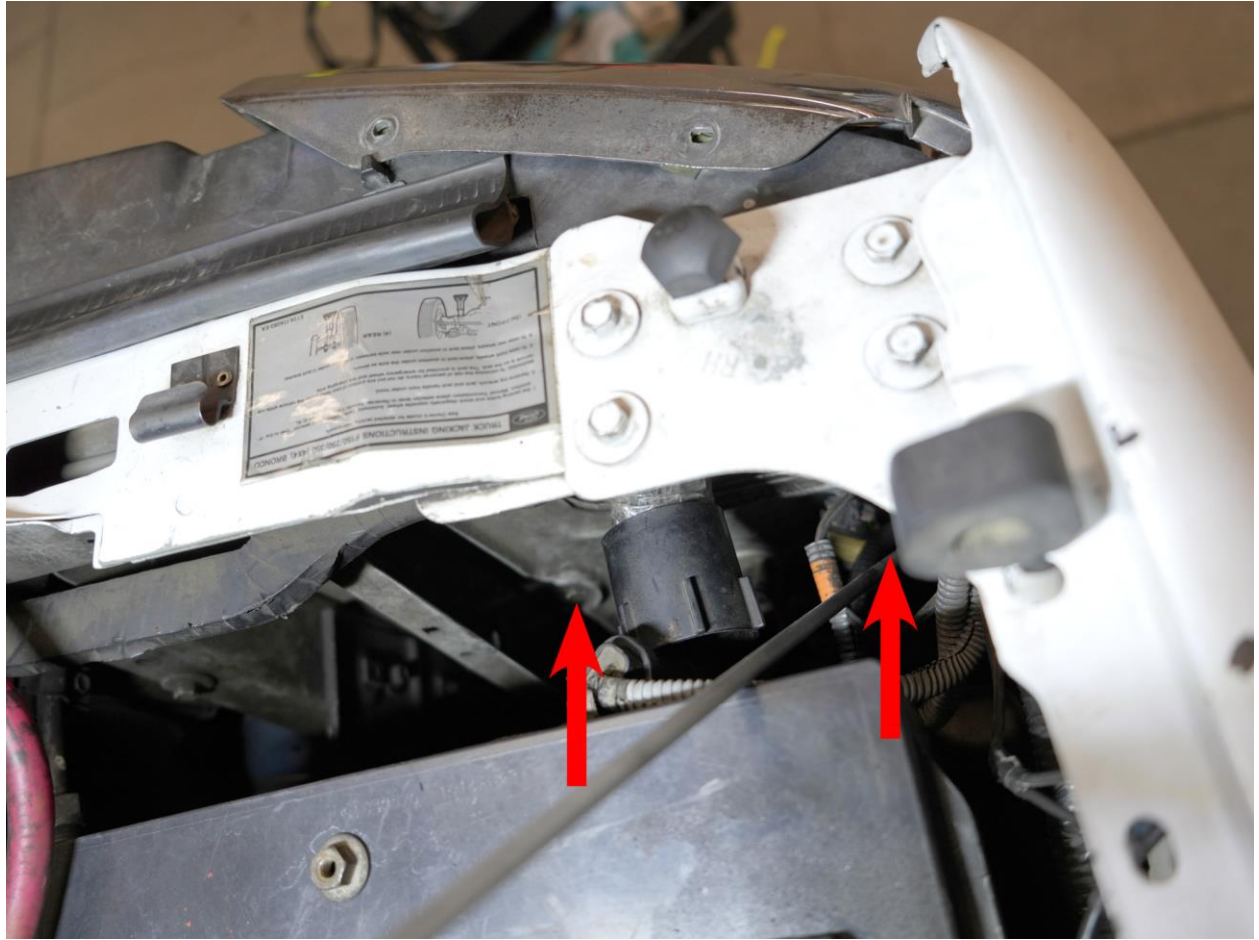

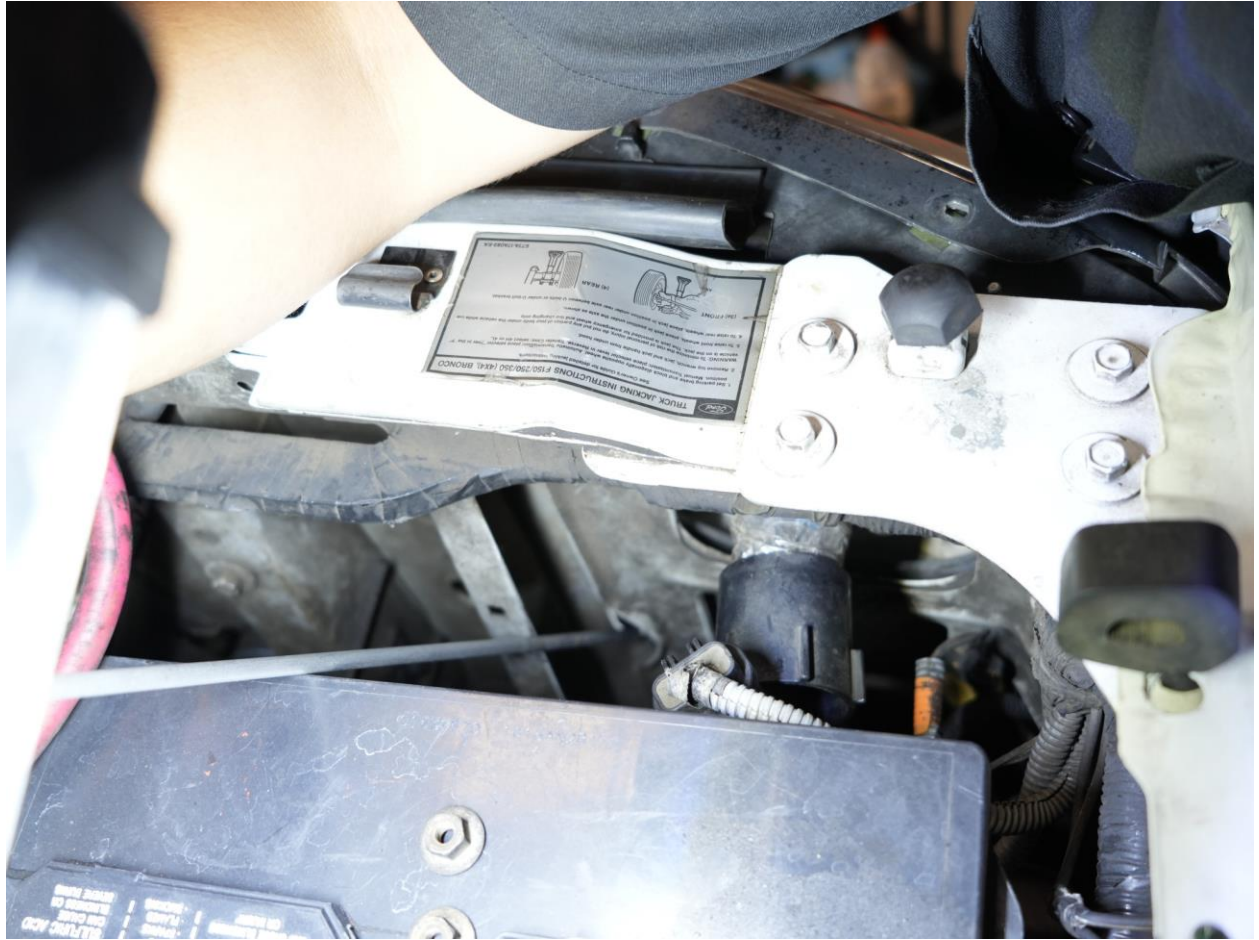

Remove the two 11mm nuts that secure the back of the headlight housing.

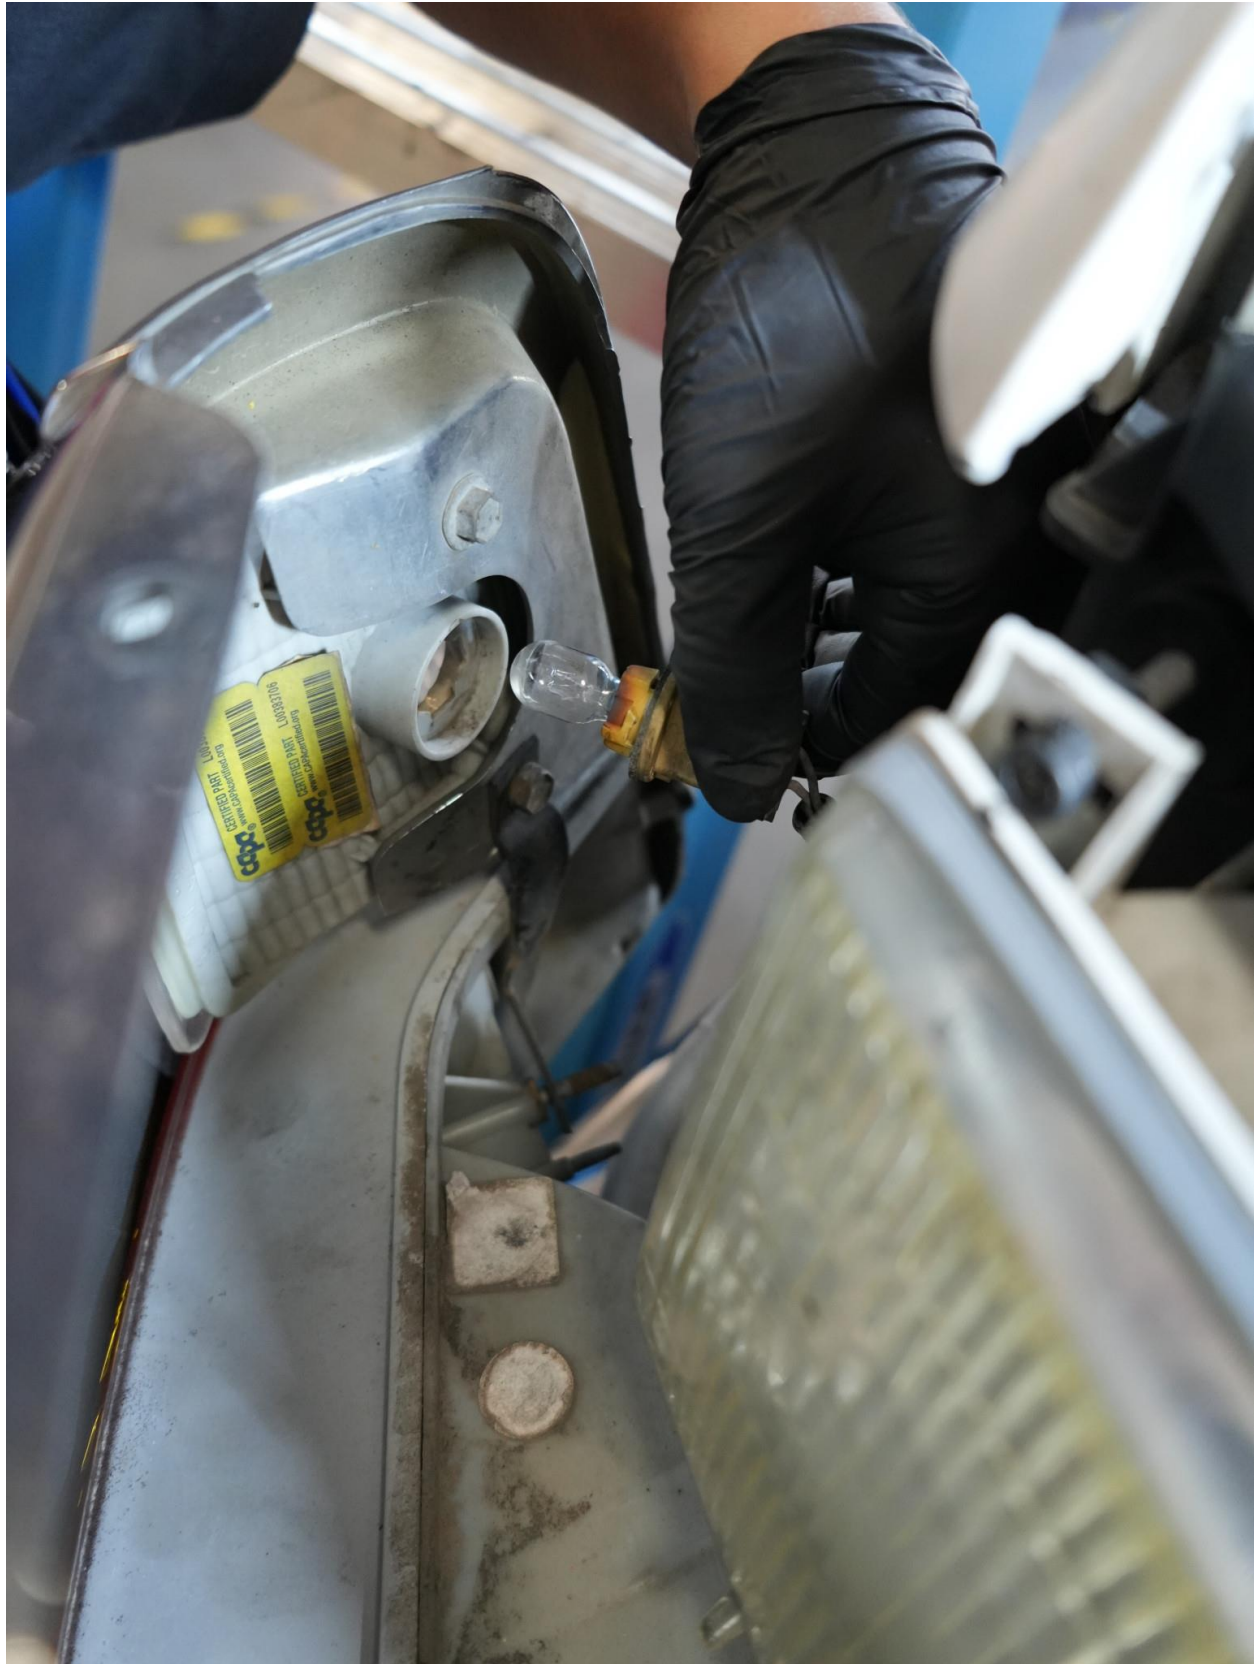

Carefully pull the headlight housing outward to remove it, making sure to unplug the socket and the light bulbs.

Remove the metal clip that holds the headlight from the side.

Pull the headlight outward to remove the assembly completely. Ensure to disconnect the light connector. Repeat the same steps for the other side of the headlight.

## **PART II - Install Headlights**

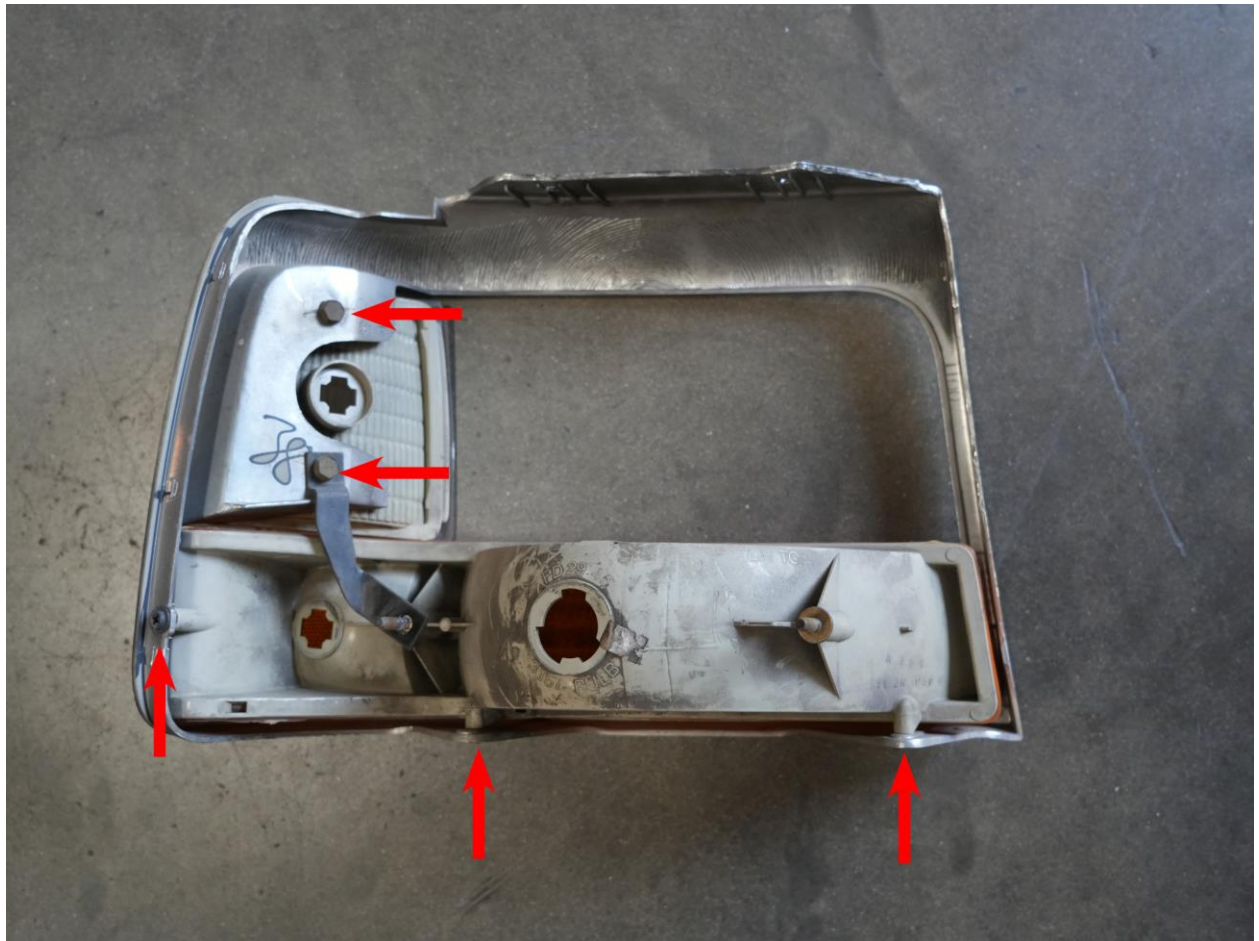

### **TRANSFER THE HEADLIGHT BEZEL TRIM**

First, unscrew the two 11mm bolts and the three screws that secure the bezel and the headlight housing.

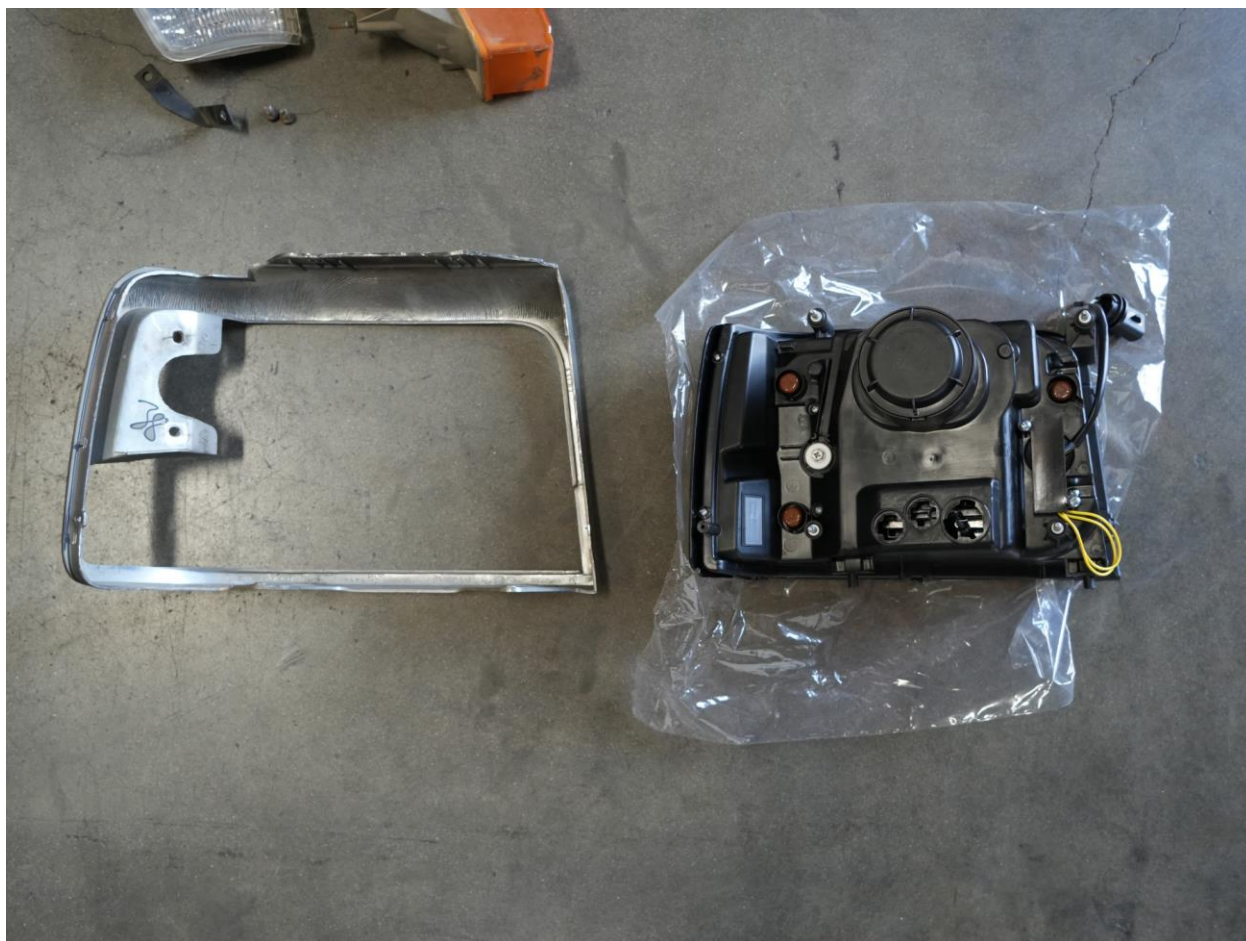

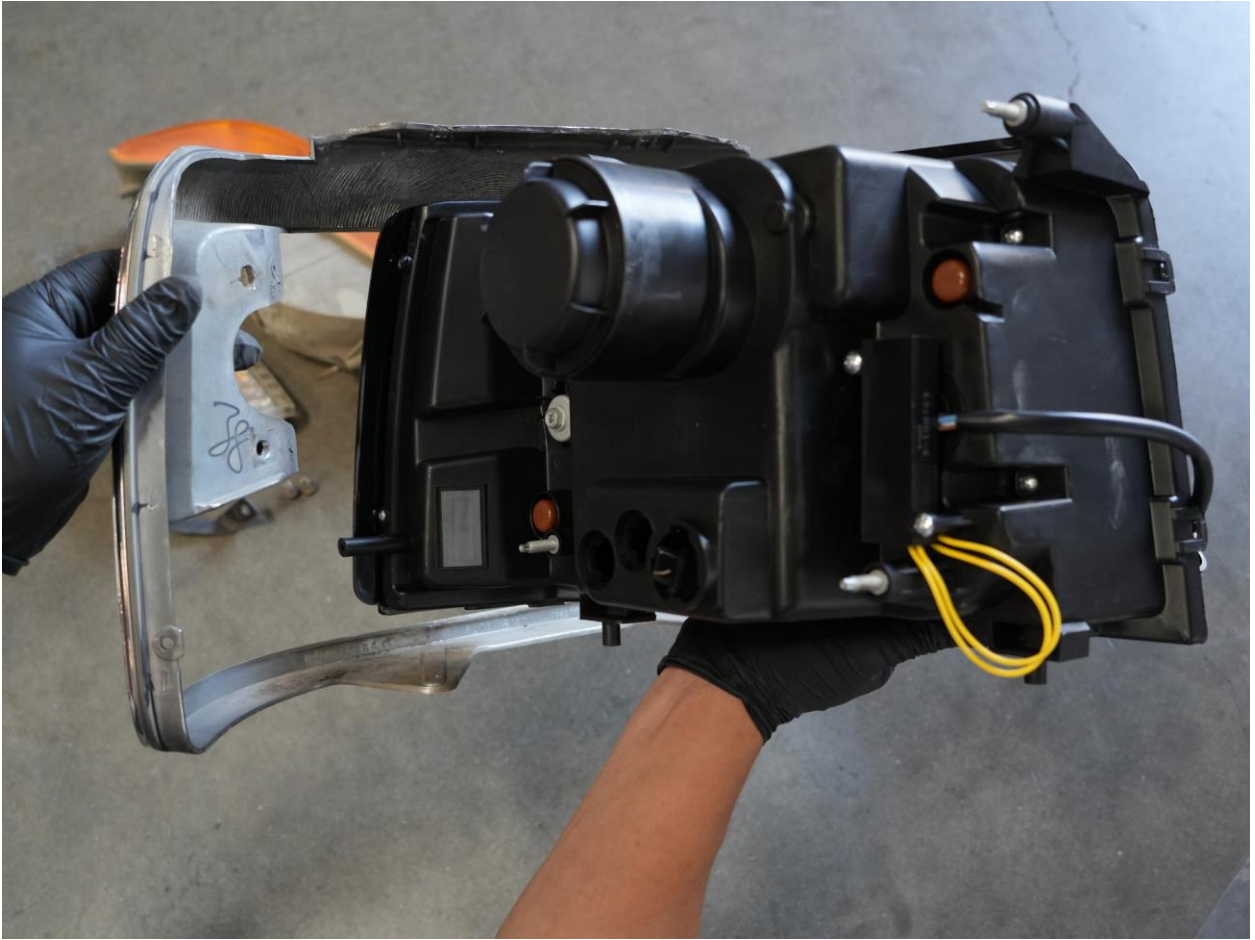

Transfer the vehicle's headlight bezel trim to the new ALPHAREX headlights. Slide and install the ALPHAREX headlight to the bezel, making sure to secure it with the three screws. Repeat the same steps for the other side of the headlight.

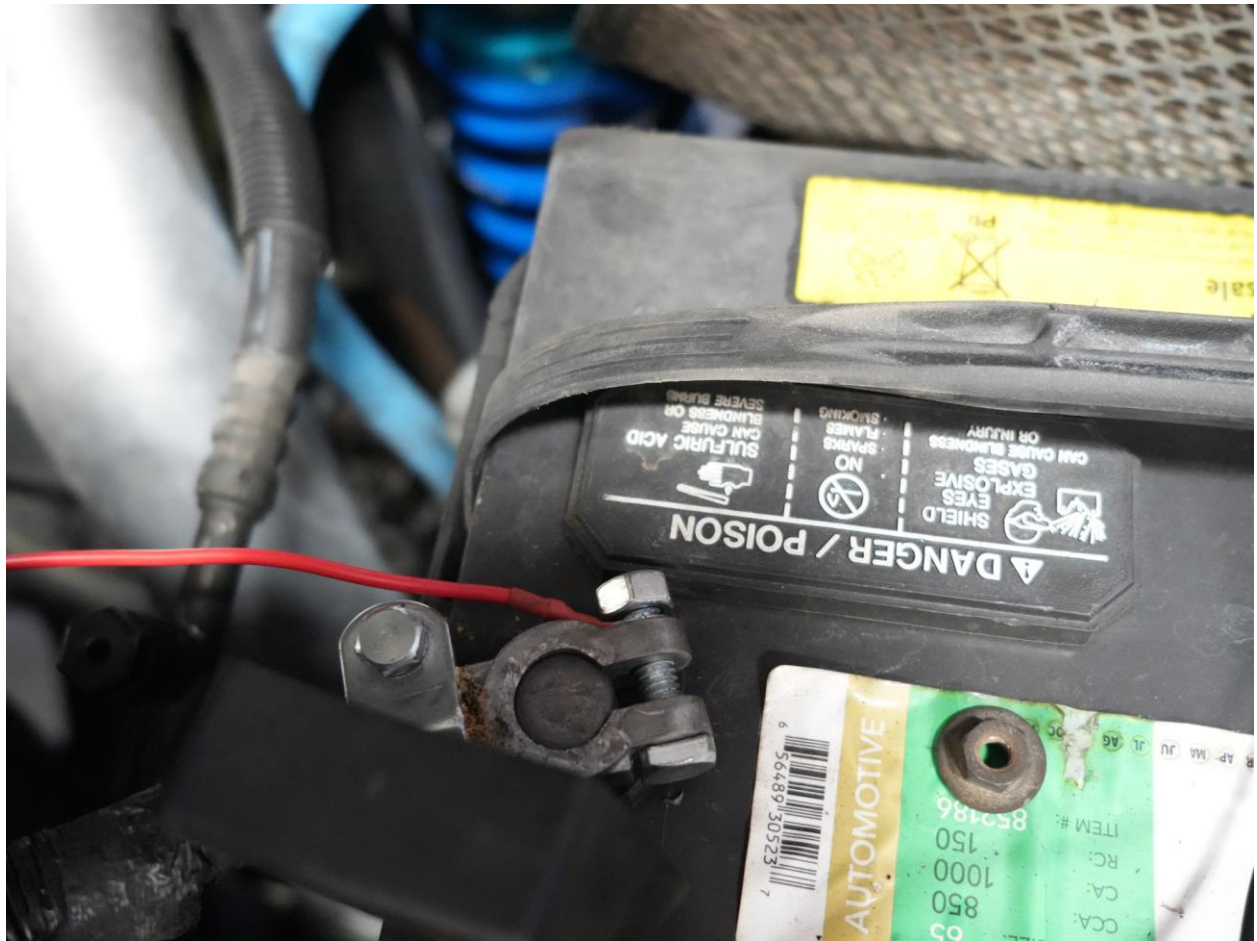

### **TAP THE FUSE AND ROUTE THE DRL HARNESS**

Now that both headlights are ready to install into the vehicle, proceed with installing the DRL (Daytime Running Lights) harness. Connect the red wire to the positive terminal of the battery and the black wire to the negative terminal.

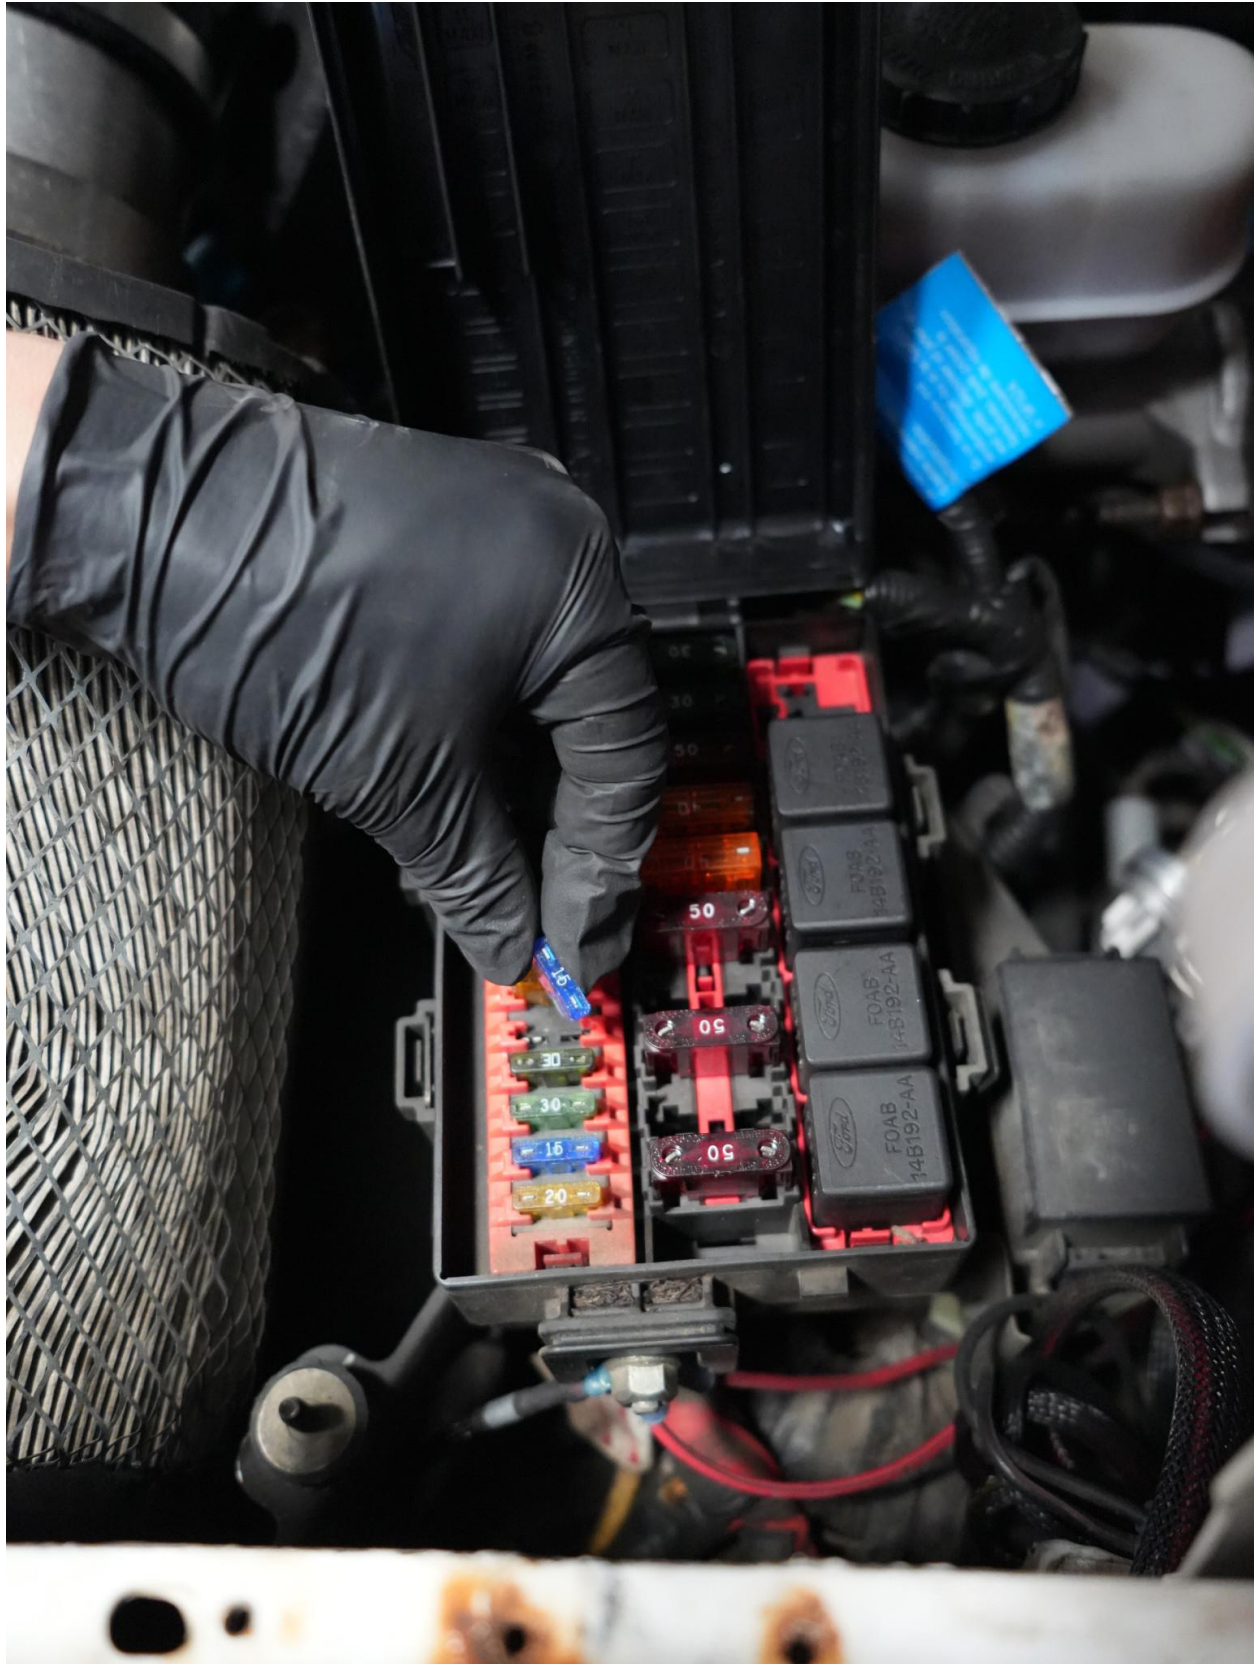

Open the fuse box cover on the driver's side and tap the DRL fuse to 10A.

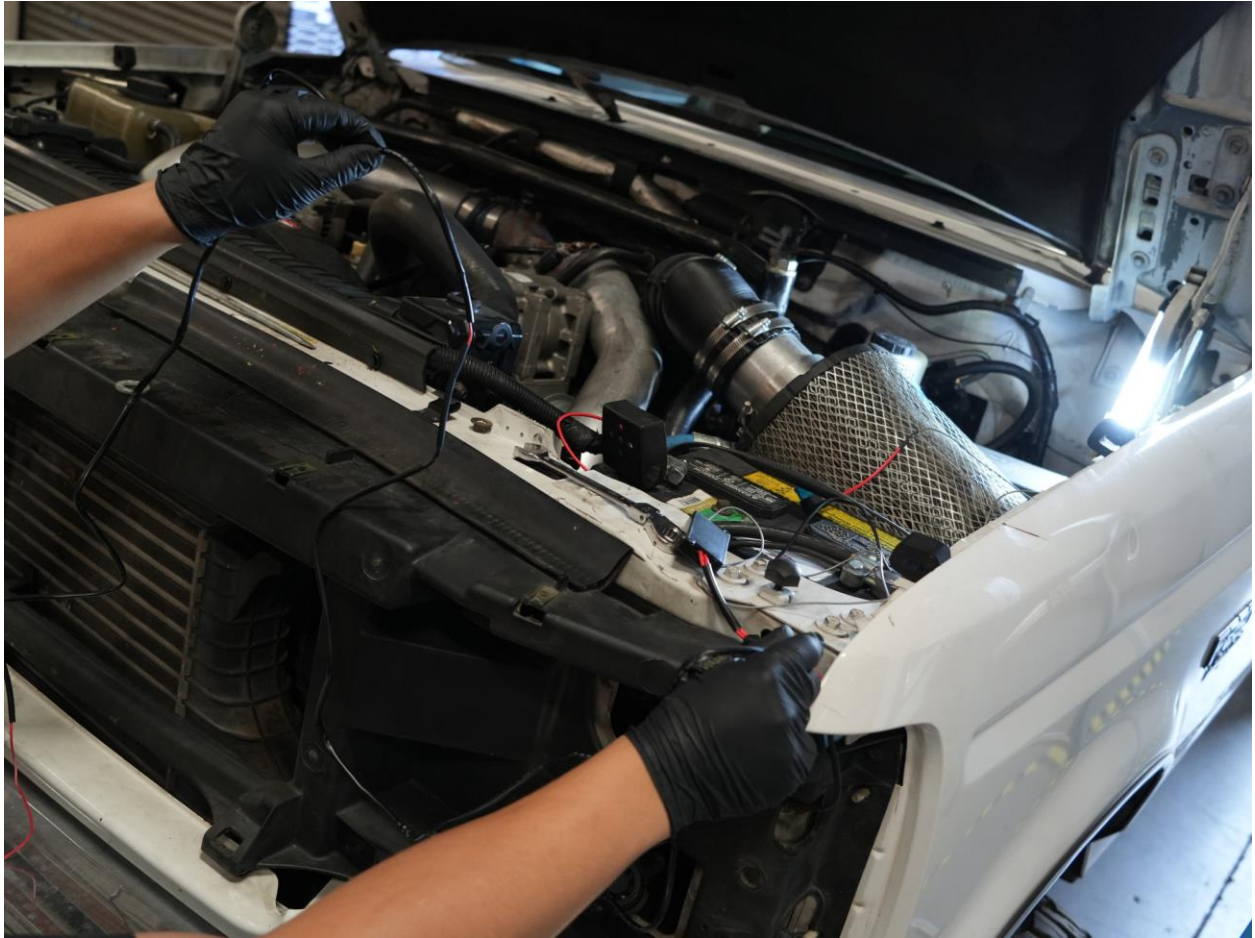

Close the fuse box and proceed by guiding the DRL harness to both headlight

locations.

### **PLUG AND INSTALL HEADLIGHTS**

Connect the DRL wire and plug in the light sockets to the new ALPHAREX headlights. DO NOT USE DIELECTRIC GREASE!

Remove the parking and turn signal light bulbs and connect them to the new ALPHAREX headlight.

Install the headlight into the

vehicle.

Fasten all the headlight screws securely and reverse the removal process to finish the installation. Repeat the same process for the other side of the headlight.

### **TEST THE HEADLIGHT FUNCTIONS**

Test the functions of your ALPHAREX headlights to ensure everything works properly.

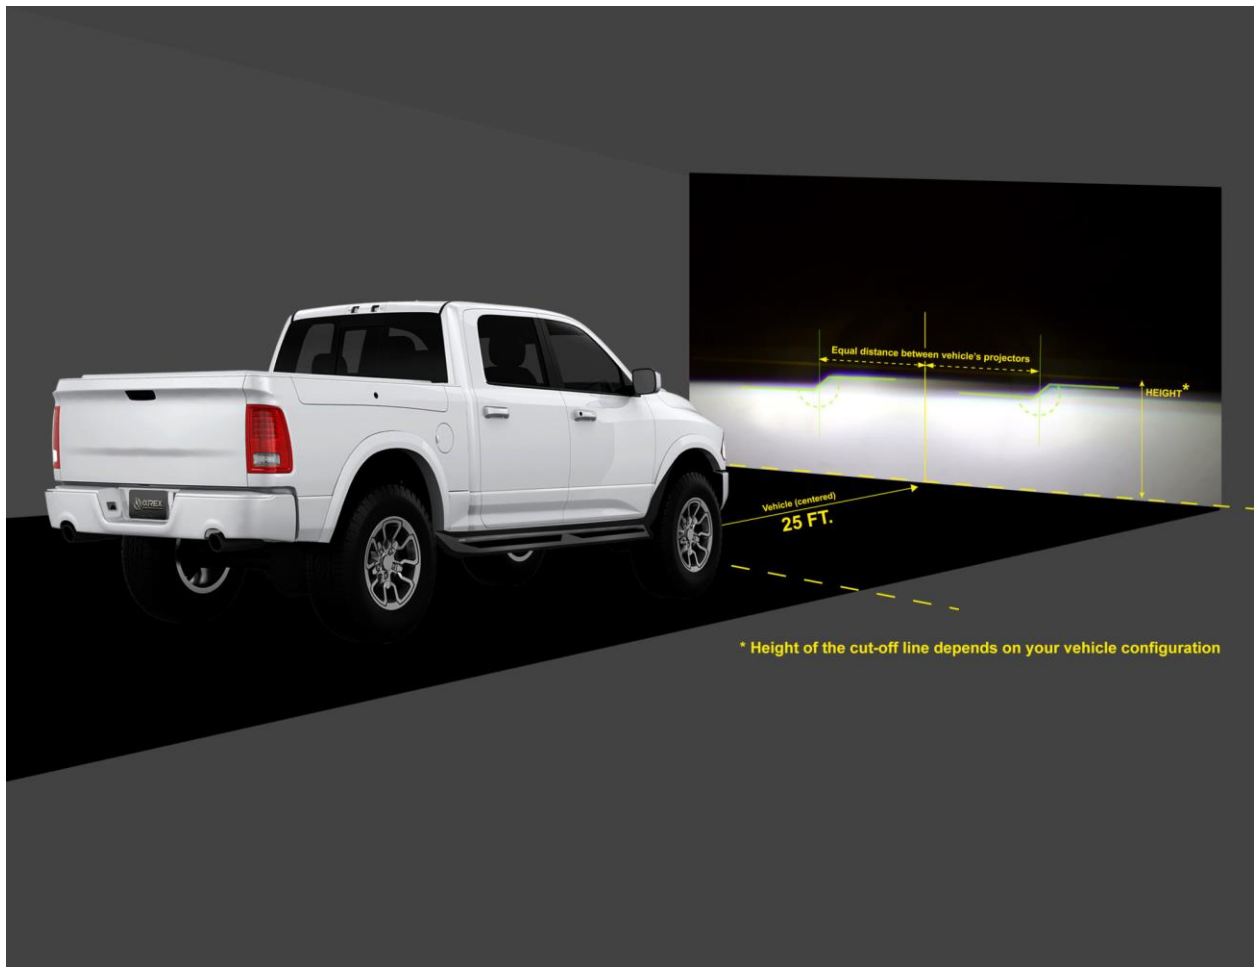

### **ADJUST HEADLIGHT LEVEL**

Once everything has been tested, aim your ALPHAREX headlights by parking 25ft from a wall and level the headlight evenly.

**Turn clockwise:** to lower the light

**Turn counterclockwise:** to raise the light

## **COMPLETE INSTALLATION**

Congratulations! You have completed the installation for ALPHAREX 1987-96 Ford F-Series | Bronco HEADLIGHTS.
