Adjustable Drop Receiver Installation Instructions

Note: For Flat Towing Use Only.

1. Slide the adjustable drop receiver into the vehicle hitch receiver, insert 5/8" pin through receiver, and insert clip into pin.

Tools Required

Tape Measure

2. Measure the tab height of the vehicle. Install the adjustable receiver onto the receiver shank, using the 5/8" x 3-11/16" pins with 3/16" x 1-1/4" lynch pins. Measure the height of the adjustable receiver. The receiver height needs to be the same or 3" above or below the height of the vehicle attachment tabs, adjust as necessary.

Note: Moving up or down one hole on the receiver allows for 1" of adjustment.

Note: When properly installed the lynch pin ring will snap back onto itself, and the chamfered side will be facing outwards.

3. Insert set screw to eliminate any excess play.
4. Insert the tow bar into the receiver and set-up per the manufacturer's instructions.

Note: The towing weight should not exceed the hitch weight rating.

| Item No. | Part No. | Description | Qty. |
|----------|----------------|--------------------------------------|------|
| 1..... | 200-1483 | 5/8" x 3" Eff. Pin with Clip..... | 1 |
