RANGE TECHNOLOGY **FLOWMASTER**
THE PERFORMANCE TECHNOLOGY COMPANY

2007-2018 GM TRUCKS • 2010-2024 CAMARO
2014-2019 CORVETTE

Flowmaster exhaust and GM V8s make a great combination, but those equipped with AFM can lose the muscular tone once they drop to 4-cylinder mode. To make sure your V8 powered ride runs on 8 cylinders all the time, we're offering this limited time promotion of a FREE Range Products ra003b dongle that will eliminate AFM on your car or truck! Purchase any of the listed qualifying skus during the promotional period to qualify. Submit the rebate form and upload proof of purchase [here!](#)

FEATURES AND BENEFITS

- All of our exhaust systems are mandrel bent to maximize the exhaust flow and performance.
- We have applications for hundreds of classic and late-model vehicles.
- Systems are available in mild steel or stainless steel to fit your needs and budget while offering maximum durability.
- Many applications have multiple tones and sound levels to choose from so you can get the sound and performance that you are looking for.
- Range AFM/DFM Disabler keeps you in full power 100% of the time
- The Range AFM/DFM Disabler does not reprogram your factory ECU
- Leaves no trace. Unplug it to return to factory settings
- Simply plug into your onboard OBD-II port and it instantly begins working to eliminate the AFM system
