

Guardian Comfort Jeep Headliner

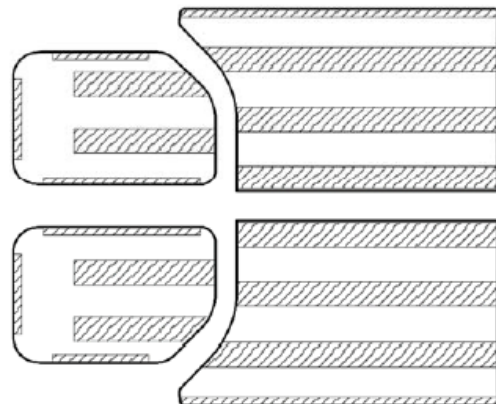

JEEP JK HEADLINER INSTALLATION INSTRUCTIONS

1. Read all instructions before installing.
 2. Removal of the hardtop is recommended, but not required.
 3. Lay parts out to check the placement of the individual panels to the corresponding position on the hardtop.
 4. Using a clean, lint-free cloth, clean the attachment surface of the hardtop using isopropyl alcohol. When the lint-free cloth becomes visibly soiled, use a fresh clean one.
- NOTE:** THE HARDTOP ATTACHMENT SURFACE TEMPERATURE SHOULD BE 68°F OR HIGHER IN ORDER FOR THE ADHESIVE STRIPS TO ACHIEVE MAXIMUM ADHESION. ALSO, DO NOT CONTAMINATE THE ADHESIVE BY TOUCHING IT WITH YOUR FINGERS.
5. Beginning at one side of each headliner panel, remove adhesive liner from the adhesive strips and place the panel up to the hardtop. Press firmly to ensure all the adhesive strips are thoroughly attached to the hardtop.
 6. Repeat steps 3 through 5 for the rest of the headliner panels.
