UNIVERSAL MOUNTING BRACKET INSTALLATION

① x2
Quick Mount
Bracket

② x6
Phillips head
screw

Cut out supplied template and tape to the D-pillar as shown. Using a center punch, mark holes as specified by the template.

Using a power drill and 9/64" drill bit, drill through the sheet metal. If equipped with a bedliner, drill through bedliner.

Fasten mounting brackets using the supplied self-tapping Phillips screws and torque to 30 in. lbs. If equipped with a bedliner, install mounting brackets over bedliner.

NOTE: If bedliner has contours that may prohibit a flat, solid mounting surface, cut out a rectangular section to clear the bracket and mount the bracket directly to the metal D-pillar.

BED X-TENDER ASSEMBLY

Using template measure 7" from each end of the three long tubes and mark with tape. **Tape is to be used as a reference point. (See step 6)**

Note: Template on last page of install sheet.

1

Slide the center tube (With Amp logo) into the center tube of the 3-tube assembly. **Be sure to slide on Strap Buckle Assembly to center tube of Pivot Upright Assembly**

Note: Tubes do not need to be pushed in to taped edge.

2

Insert the top long tube into the top tube of the 3-tube assembly.

Note: If tube joints are tight Soapy Water can be used.

3

Insert the bottom long tube into the bottom tube of the 3-tube assembly.

4

Repeat for the other side.

Note: Install Strap Buckle Assembly to center tube of Pivot Upright Assembly.

5

Adjust the width of the MOTOXTENDER to fit the pre-installed mounting brackets. To keep tube overlap constant, adjust each tube so that the gap between the edge and the tape is the same.

6

BED X-TENDER ASSEMBLY – CONTINUED

Attach plastic upright around the tube juncture, placing rubber bumpers into the two ends of the upright.

Upright is not positioned in center of tube joint.

NOTE: The inside of the upright is stepped to fit correctly around the small and large diameter tubes.

7

Tighten PT-Screws using a T-25 torx driver, starting in the middle of each upright, then the outer screws and lastly the remaining two to evenly tighten.

NOTE: Do not over tighten as this may strip out. Fastener will reach a noticeable stopping point.

8

Adjust Strap Buckles to lock into the tailgate when BEDXTENDER is deployed. Your assembly is now complete.

9

For Toyota applications the supplied Strap Buckle Insert must be used.

Remove the PT-Screw with a T20 Torx driver.

10

Install Strap Buckle Insert with the provided 10/32 x 7mm socket head cap screw with a 4mm hex key. Repeat for other strap.

11

12

When the BEDXTENDER is at the furthest rear position, push down on the buckle to insert into tailgate latch. Tighten straps. To release, pull tailgate handle.

NOTE: Ensure that buckles are properly inserted into latches by pulling on the straps after both buckles have been inserted.

Pull tailgate release handle to release buckles from the tailgate.

Before flipping the Bed Extender into the cargo divider position, secure the buckles/straps on the top clips while the Bed Extender is outward position, this is to secure them from swinging.

8

The straps will be secured on the bottom clips when Bed Extender is flipped in, this will leave the top clips free to use to hold grocery bags if needed. Closing tailgate to keep cargo secured in bed.

Congratulations on the purchase of your REALTRUCK AMP Research BedXTender HD™

Here is what you should know...

With the tailgate open, place BEDXTENDER pivot pins into the left and right mounting brackets. Rotate to 45 until it drops into place, then lower onto the open tailgate.

Flip BEDXTENDER out to contain cargo in the truck bed when the tailgate is open. **CAUTION!** 200lb maximum load on open tailgate. Always distribute cargo evenly and properly secure inside bed. Do not secure cargo to the BEDXTENDER or the tailgate.

Before driving, secure BEDXTENDER by locking the provided strap buckles into the truck's tailgate latches. To release, pull tailgate handle. **NOTE:** Ensure that both buckles are properly locked into the latches by pulling up on each strap.

Flip BEDXTENDER forward and close the tailgate to keep smaller cargo safe and organized.
