2. Remove the bottom bolt on the windshield retaining brackets. The windshield retaining bracket is the bracket that bolts the windshield frame to the dashboard.

Wranglers only: Use your finger and feel for the bolt hole with windshield brace was bolted into on the front side of the center hoop, and cut an "X" with the razor blade. Tilt your windshield back up until the windshield brace meets the roll bar. Unzip the roll bar pad enough to insert the bolt under the roll bar pad, then insert the bolt through the cut and start turning the bolt by hand, then tighten with the ratchet.
