1. Brackets should be placed from the front of the vehicle at 16" 35" 47" & 631/2" (See Picture A)
2. Mount longer brackets on pinch weld with two tec screws.
3. Mount running board hanger brackets with 5/16" bolt and nut on the front and rear
4. Mount center running board bracket very loosely with 5/16" bolt and nut
5. Adjust front and rear brackets for desired height and tighten bolts.
6. Install boards and tighten on front and rear brackets. Tighten boards on center brackets and tighten hanger brackets to running board brackets.
7. Put a tek screw in the top of each running board bracket.
